

JENNIFER M. GRANHOLM
GOVERNOR

STATE OF MICHIGAN
DEPARTMENT OF ENVIRONMENTAL QUALITY
LANSING

STEVEN E. CHESTER
DIRECTOR

OPERATIONAL MEMO 147-1

TO: All PCB Waste Manifest Users

FROM: George W. Bruchmann, Chief
Waste and Hazardous Materials Division

DATE: September 1, 2006

SUBJECT: Manifesting Polychlorinated Biphenyls (PCB) Waste

PCB waste in concentrations of 100 parts per million (ppm) or greater is regulated pursuant to Part 147, PCB Compounds, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended. *Michigan Administrative Code*, R 299.3316, requires that a manifest accompany all shipments in Michigan of PCB or PCB-contaminated materials intended for disposal.

A federal rule change, effective September 5, 2006, requires the use of a new Uniform Hazardous Waste Manifest (Form 8700-22) and, if necessary, the Continuation Sheet (Form 8700-22A) for both interstate and intrastate transportation of hazardous waste as defined in federal and state law.

In accordance with the state rule, the new federal Uniform Hazardous Waste Manifest, Continuation Sheet, and associated instructions, effective September 5, 2006, shall be the manifest used to comply with the Part 147 manifesting requirements.

Note: The federal Toxic Substances Control Act (TSCA) also regulates PCBs in concentrations of 50 ppm and greater and requires the U.S. Environmental Protection Agency (U.S. EPA) Form 8700-22 to be used for regulated PCB shipments. Go to <http://www.epa.gov/pcb> for information about manifesting as required by Title 40 of the Code of Federal Regulations, Part 761, Polychlorinated Biphenyls (PCBs) Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions. Call the U.S. EPA TSCA hotline at 202-554-1404, or contacts for each U.S. EPA Region are available on the above Web site. Information about the federal manifest is available at <http://www.epa.gov/epaoswer/hazwaste/gener/manifest>, and state of Michigan information is available at <http://www.michigan.gov/deqwaste>.
